ABOUT THE TEST & PROCESS

The Biome360 Health Check is a functional screening designed to analyze microbial balance and lifestyle influences. This report combines microbial signals detected from the sample with lifestyle data to provide a clinically meaningful overview.

The Biome360 Health Check has been performed for over 10,000 individuals across the globe, and is adopted as a test for initial indication of microbiome health.

(Turnaround Time: 7–10 business days from sample receipt.)

Our Process

Sample Collection

Performed using sterile collection kits designed to capture and retain microbes in the sample.

Transport

Transferred under cold chain to The Proven Code's specialized lab in New Delhi.

Laboratory Review

Analyzed using the proprietary BiomeAnalysis360™ framework.

Report Generation

Reviewed through automated logic validated by clinical advisors.

Suggested Next Step

undefined

Summary Page

| Parameter | Observation | Comment |
|-------------------|-------------|--|
| Bacterial Signal | - | Bacterial signal indicates presence of bacterial activity in the sample. |
| Yeast Signal | - | Yeast signal analysis shows no significant yeast presence. |
| Specimen Validity | - | Specimen analysis indicates potential issues with sample collection or handling. |

Analytical Observations

Scoring System: ● 1-2 Normal ● 3 Borderline ● 4 Elevated ● 5 High

| Parameter | Status | Score |
|----------------------|--------|-------|
| Digestive Rhythm | Normal | 0/5 |
| Fermentation Load | Normal | 0/5 |
| Bacterial Balance | Normal | 0/5 |
| Yeast Balance | Normal | 0/5 |
| Immune Tone | Normal | 0/5 |
| Gut-Brain Stress | Normal | 0/5 |
| Circadian Sleep | Normal | 0/5 |
| Diet Quality | Normal | 0/5 |
| Medication Impact | Normal | 0/5 |
| Hydration & Recovery | Normal | 0/5 |

Interpretive Narrative

Key Findings

Recommendations

Balanced

Maintain current lifestyle and dietary habits. Continue with regular wellness monitoring.

Mild Imbalance

Consider a 4-week gut reset program focusing on dietary modifications and probiotic support.

Moderate Dysbiosis

Consider a structured 4-week gut reset program with clinician review.

Significant Dysbiosis

Recommend Advanced Functional Microbiome Analysis for comprehensive assessment and personalized treatment plan.

Advanced Analysis Available

For a more comprehensive understanding of your gut microbiome, consider our Advanced Functional Microbiome Analysis. This assessment provides species-level identification, metabolic pathway mapping, and personalized intervention recommendations.

Lifestyle Guidance

Expert Review

Expert Review Note:

Please consult your clinician for advanced interpretation and a personalized care plan.

Disclaimer:

This Biome360 Health Check Report is a **wellness-oriented microbiome assessment** and is not intended for diagnosis or disease identification. All interpretations are based on **microbial metabolite patterns and research-based scientific literature**, and should **not be considered a substitute for medical advice**.

Always consult a qualified healthcare provider before making any changes to medication, supplements, or treatment plans.

In case of any concerning symptoms or medical emergencies, seek medical attention immediately.
